ABSTRACT

The third edition of an annotated guide to library materials is designed and intended for students majoring in political science; however, it would also be useful for instructors and students in the other social science disciplines. This handbook is divided into two sections: General Reference Books in the Social Sciences, and Guides and Bibliographies related to specific fields of study, with emphasis on political science. General Reference Books is an annotated listing of general guides, handbooks, library catalogs, periodical and book review indexes, and government documents useful for most general areas of the social sciences. The other section lists materials such as handbooks, indexes and abstracts, and library catalogs which apply to related fields of study, ranging from aging to urban studies. An author/title index is provided. (Author/RAA)

FOREWORD

So You Are Doing Research, now in its third edition, is designed and intended primarily for use by students majoring in Political Science. We hope that this handbook will also be helpful for instructors and students in other social science disciplines, and will ease some of the frustrations encountered in early efforts at library research.

The handbook is a project of the Southern Center for Studies in Public Policy, a research and teaching agency at Clark College. It was prepared under the direction of Ollye G. Davis, the center's Librarian, who deserves primary credit for its content and format. Mrs. Davis was assisted by Connie Starks. Mrs. Starks constructed the index and typed the manuscript.

Those of us who work at the SCSPP are proud of and grateful for our library. We hope that dissemination of this handbook encourages others to make effective use of the facility.

INTRODUCTION

Substantial revisions and additions both in content and in organization have been made in the third edition of So You Are Doing Research. This handbook is divided into two sections: General Reference Books in the Social Sciences and Guides and Bibliographies related to specific fields of study in the Social Sciences (emphasis in Political Science). The first section, General Reference Books, is an annotated listing of general guides, handbooks, library catalogs, and periodical and book review indexes, government documents, etc. useful for most general areas of the Social Sciences. The other section list handbooks,indexes and abstracts, library catalogs, etc. which apply to specific fields of study.

This material is only a partial listing of available resources in the Social Sciences. The resources herein listed and annotated are available at the Policy Center's Library; Marquis L. Harris Library (Clark College); Trevor Arnett Library (Atlanta University); the Atlanta Public Library, and Georgia State Law Library.

Annotations appear for most items listed. In a few instances, the annotation is omitted when the title is indicative of the contents of the publication. A table of contents and author/title index are included for easy accessibility.
